

Round Chisel

A lightweight and strong round nose chisel, ideal for re-shaping curved panels. The chisel head can be reshaped and dressed with a sander or file to suit various panel repairs.

Additional Information

- 95mm wide round nose chisel for re-shaping curved panels.
- 280mm long.
- Lightweight, ultra-strong & shock resistant, minimising panel marking.
- Manufactured from high density nylon.
- Also available in a set, please see Part No. 91946.
