

Tec-Spot Welder

The Tec-Spot Welder is designed for fast, efficient body repair, removing dents quickly. It works from the outside, so can be used on double-skinned panels and without the need to remove interior trim and fittings. An ideal general use welder in the professional body repair shop.

Additional Information

- For welding panel pulling pins, pull washers and squiggly wire.
- Supplied with a slide hammer and multi hook head; automatic shut off when transformer reaches 120°C (or after approximately 25 nails).
- Electrodes for pull washers, pulling bits, squiggly wire and a shrinking diode for single spot tips.
- Consumables include: 50 pull washers, 50 straight pulling bits and 20 squiggly wire.
- CE & UKCA compliant.
