

## Riveting System Plus

50kN self-piercing riveting system, supplied in a storage box together with a set of three heads and an organiser box containing 50 consumable rivets. Self piercing rivet bonding construction is used by major vehicle manufacturers and offers a convenient, easy to use, but very powerful solution for the body panel repair of these vehicles.

### Additional Information

- Kit complete with 35, 110 & 220mm heads.
- Self piercing rivets are used by major car manufacturers including: Audi, Jaguar, Land Rover, Daimler, BMW etc.
- As there is no heat generated it can be used on OHSS/Boron steels without weakening the steel, or damage to the eco-coatings, therefore better corrosion warranty.
- Safer than welding no sparks to cause damage. Less preparation time.
- Safer than welding no sparks to cause damage. Less preparation time.
