

## Compact Aviation Snips - Left Cut

A pair of left cut aviation tin snips suitable for cutting sheet metal, including stainless steel, up to 1.2mm in thickness. They feature super sharp, durable chrome molybdenum blades for smooth cutting. Have a compact design, making them ideal for use in tight areas, and also feature ergonomic soft grip red TPR handles.

### Additional Information

- For long continuous straight & left cut curves.
- Cutting capacity: 1.2mm stainless steel.
- Jaws are manufactured from Chrome Molybdenum.
- 2-tone soft grip TPR handles.
- Compact size allows them to be used in tight areas.
