

Evo Twin Miracle Welder

The revolutionary new Miracle Evo Twin welder now features two output cables to make body repair easier. One output cable can be set up for welding on straight and twisted bits, while the other cable set up for the easy puller or slide hammer, eliminating the need to remove the washer weld tip to use other tools. A great time saving upgrade for the already incredible Miracle Welder.

Additional Information

- Features a digital microprocessor & two output cables.
- Allows for the use of easy puller & washer/bit welder at the same time, without changing cables.
- Excellent weld penetration. Provides low heat build up.
- Can be used with remote control, Part No. 91602.
- Trolley not included but available separately, please see Part No. 91606.
