

Scangrip I-Match 3 Headlight

Lighting solutions for the automotive painting industry.

Scangrip Colour Match lighting solutions are specially designed for the automotive painting industry, and are made for colour matching, detailing and general paint work and are usable everywhere a painted surface needs inspection.

The COB (chip on board) LED technology provides a unique, uniform and completely even illumination with only one shadow which makes it particularly effective for detailing and colour matching light. The colour temperature (KELVIN) exactly fits the specific requirements for efficient work light in the automotive painting industry. The newly invented CCT SCAN functionality offers the option to scan the surface of an object with the various colour temperatures available in the interval from 2500K to 6500K. CCT SCAN functionality provides optimum conditions for the most accurate colour match and highlighting and discovering paint defects. 03.5656
