Scangrip UV-Light

A flexible and rechargeable LED UV light designed for fast curing of small and medium cure areas. Can be used for curing of plastic parts and other heat sensitive materials, due to no heat being produced on the panel during the curing process. UV-LIGHT is a very handy lamp and easy to carry in the pocket or in the work belt with the built-in clip. The turnable and sturdy hook and strong built-in magnet enables you to place the UV curing lamp anywhere you wish. The lamp is equipped with a tiltable 180° lamp head and a solvent resistant, exchangeable glass lens. The included charging base makes charging easier than ever. With the intelligent battery indicator on the front, you will always be informed about the battery level. The ergonomic design and shape provide a comfortable grip making it the perfect handheld UV light for curing.

Additional Information

- Fast curing process (only 1 min).
- No heat is produced on the panel or the paint during the curing, making the lamp applicable for usage on plastic parts and other heat sensitive materials.
- · See the remaining battery level with the built-in battery indicator on the front.
- 180° tiltable lamp head for the perfect curing angle.
- Equipped with an exchangeable solvent resistant glass lens. UV protective glasses recommended to worn during use, please see Part No. 03.5759.
