

Micro Clamp

A lightweight aluminium clamp used to position and fix panels in place in preparation for welding. The compact design allows the clamp to get into places other clamps may not fit.

Additional Information

- Tiny yet versatile - just 95mm long.
- Simple brass screw adjustment; jaw range: 0 - 11mm.
- Quick release / locking lever; designed for single handed operation leaving the other hand free to position the panel.
- Small and strong allowing up to half a ton of pressure. Spatter resistant; dissipates heat when welding.
- Set of 4 Micro Clamps available, please see Power-TEC Part No. 91985.
