

Plugweld Pliers

Plug weld pliers firmly clamp and support the weld area. The copper plate ensures welding will not stick, making this an ideal tool for use while MIG welding

Additional Information

- Ability to use a higher welding heat allows improved weld penetration.
- Copper plate ensures weld does not stick, even with a pilot hole through the back panel.
- Securely clamps & supports the weld area.
- Includes adjustment screw & quick release.
- Ideal clamp to use when MIG welding.
