

Vertical Pull Kit for Pulling Tower

An additional anchoring plate / suction pad specifically for use with the Power-TEC Pulling Tower (Part No. 92657), to allow for the tower to be used in a vertical position such as pulling down on damaged floor pans or sills. The 280 x 330mm plate features a vulcanised rubber pad and is held onto the ground using the workshop air supply, allowing it to be used anywhere on the workshop floor without the need to drill in any anchor points or fixings.

Additional Information

- Designed for use with Power-TEC Pulling Tower (Part No. 92657).
- Provides an additional anchor point to counterbalance the tower to be used vertically.
- Dimensions: 280 x 330mm.
- Attaches via pneumatic suction, from the workshop air supply, therefore no fixings required.
- Additional Pulling Tower accessories also available, please see Part No. 92659 (Pole Extension).
