

Rivet Drill

Self centring drill used to drill out rivets, including self-piercing blind, dome and dome pin rivets in aluminium panels, saving time and minimising damage.

Additional Information

- Rivet drill grabs around the rivet head ensuring proper centering with no slippage.
- The tip can be changed for centering on any size of rivet head.
- Ideal for removing rivets on CFRP, Lamborghini Huracan & Audi A8 (kit approved by VAG VAS852009).
- 1000rpm; air consumption: 280cfm.
- Drill bit sizes: 4.3, 6.8mm. Replacement drill bits available, please see Power-TEC Part Nos. 91290 (4.3mm), 91291 (6.8mm).
