

Panel & Image Profiler

An ideal tool for the professional bodyshop, this contour gauge is for duplicating profiles in preparation for repairing vehicle bodywork. It's also suitable for marking out tiles, carpets, flooring, timber and metal work before cutting to shape.

Additional Information

- Ideal for estimators to assess the level of panel damage.
- Size: 255mm x 100mm x 20mm.
- Compare damaged panel to original panel profile for exact alignment.
- Manufactured from ABS plastic to prevent damage to the bodywork. Magnets along one side of the profiler to hold in place when marking out the new panel to cut for replacement.
- Also suitable for use when fitting tiles, flooring, & carpet. Can also be used for joinery, boat hull profiling, pattern making, etc.
