

## Countersink Punch

Use to create a 6mm diameter countersunk hole, allowing fixings to sit flush with the panel or sheet metal.

### Additional Information

- Punch plier tool to easily create 6mm diameter countersunk holes.
- Ideal for aluminium, as well as for patching panels.
- Use in conjunction with Power-TEC Flanger & Hole Punch (Part No. 91334) for riveting a new panel section into place.
