

Digital Temperature HL Scanner

Measures the temperature of a surface whilst being worked on with a hot air tool, giving both an audible and visual alert if it exceeds or falls below the ideal working temperature.

Additional Information

- LED light temperature scanner.
- Ideal for plastic and aluminium repair.
- An audible and visual signal warns the user when temperature exceeds or falls below the permissible limit.
- Monitors workpiece temperature by a beam of LED light.
- Ideal for use with Digital Hot Air Gun, please see Part No. 92077.
