

## Horizontal PDR Tap Down Kit

A stabilised tap down kit, ideal for use on horizontal vehicle bodywork panels including bonnets and roofs, suitable for gently knocking down high spots and removing small dents and dings. It features a stabilising arm with an adjustable rubber coated foot (allowing for 30° of movement), together with four interchangeable heads, to enable a precise and repeatable tap down action.

### Additional Information

- Tap down kit with stabilising arm & interchangeable heads, for use during a paintless dent repair (PDR).
- Length: 215mm; Width: 89mm.
- Contents: 4x hard plastic (POM) heads.
- Suitable for use to remove high spots, small dents & dings. Ideal for bonnet & roof work.
