

Nitrogen Plastic Welder with Generator/Stapler

Plastic welder featuring a Nitrogen generator, that eliminates the need for a nitrogen gas bottle. Workshop compressed air is used to maintain consistent temperature between welds — the nitrogen is only activated when pulling the trigger so that it's not wasted between welds. This model also comes supplied with an integrated hot stapler, snap off staples, corner plastic, plastic smoother and gauge. Together with a set of plastic consumables, scraper and roller to finalise the repair, and reusable trigger spray water bottle for panel preparation.

Additional Information

- Compatible with almost every type of plastic used in the automotive industry.
- Has it's own nitrogen generator which eliminates the need for a gas bottle. Including integrated hot stapler, snap off staples, corner plastic, plastic smoother and gauge.
- Allows the welding of filler material by heating with nitrogen.
- The welder comes complete with a set of plastic consumables including a scraper and roller to finalise the repair, together with a reusable trigger spray water bottle for panel preparation.
- Heats plastic without combustion and therefore without emitting fumes; 230v, 50Hz, 1600w and 20-650°C. Made in Italy.
