

Self Piercing Riveting System

50kN self-piercing riveting system, supplied in a storage box together with an organiser box containing 50 consumable rivets. Self piercing rivet bonding construction is used by major vehicle manufacturers and offers a convenient, easy to use, but very powerful solution for the body panel repair of these vehicles.

Additional Information

- Supplied with a 35mm head. 2 additional heads are available, please see Part No. 92222 (110mm) & Part No. 92223 (220mm).
- Self piercing rivets are used by major car manufacturers including Audi, Jaguar, Land Rover, Daimler, BMW etc
- As there is no heat generated it can be used on OHSS/Boron steels without weakening the steel, or damage to the eco-coatings, therefore better corrosion warranty.
- Safer than welding no sparks to cause damage. Less preparation time.
- 50 consumable rivets included. Also available separately, please see Part Nos. 92387, 92388 & 92389.
