

Plastic Welding Kit - Euro

Plastic welding kit for welding and repairing plastic parts or components, vehicle bumpers, broken headlight fixings, cracks, fractures and deep scratches. Thin plastic parts can be welded due to applied heat being contained in a small area, making this ideal for repairing small to medium sized damage that could render a panel unusable.

Additional Information

- Plastic welding kit for repairing plastic parts including bumpers.
- Kit supplied with welding head, 5 x stainless steel reinforcing mesh, 24 x plastic welding filler rods suitable for ABS (acrylonitrile butadiene styrene), PP (polypropylene), PE (polyethylene) and PS (polystyrene) plastics, plus iron stand.
- Complete with 2 pin Euro Plug.
- Stand supplied for use when hot.
- Cordless gas powered plastic welder also available, please see Part Nos. 92418, 92490.
