

Window Trim Molding Puller

Designed to slide down between the window glass with the hook side facing away from the glass, it hooks onto the lower side of the window moulding allowing it to be pulled off with the minimum of damage and effort.

Additional Information

- Window moulding (belt moulding) puller.
- Length: 191mm.
- Specifically designed for the removal of the window trim found on the outside door skin of doors with opening windows.
- Manufactured from high carbon steel (K7), with a PVC dipped soft grip handle to provide a sure, safe grip.
- Wide contact areas to help prevent bending of the moulding being removed.
