

EV Tool Cabinet - Bodyshop Package

A customised 7 drawer lockable tool cabinet, for securely storing and organising Hybrid / EV tools and safety equipment in one place. It can be set up in the workshop and moved next to the vehicle being worked on, within the restricted area, ensuring the technician has the hybrid/EV tools and PPE required easily to hand. It features customised external supports for storing safety barrier posts and bases, together with a bracket for an insulated rescue pole, freeing up valuable storage space and keeping equipment located together.

Additional Information

- Lockable 7 drawers with roller bearing runners. Overall size: 682 x 460 x 804mm. Maximum capacity: 400kg.
- Includes tools included in our Hybrid & EV Premier Safety Package (Power-TEC Part No. 91609). All equipment supplied meets with motor manufacturer requirements.
- Includes unique supports to store safety posts, bases and rescue pole (Laser Part Nos. 6643, 6644 & 6638); 4 wheels (125mm) - 2 fixed & 2 swivel with brakes and heavy duty side handles allow for easy manoeuvrability. Made from cold rolled steel with powder coated paint finish.
- Standard base tool cabinet available, please see Laser Part No. 5083.
- The content for this cabinet can be tailored to include specific hybrid/EV tools and safety equipment required, with EVA foam trays providing safe storage and easy identification of any missing tools. Please contact Power-TEC for further information & to discuss requirements.
