

## Soft Edge Masking Tape Dispenser

This tool is designed for folding paint masking tape with a soft edge which slightly lifts up the tape to allow the paint spray to disperse avoiding a hard tape line or paint build up, making it easier to fade out paint and blend in with cutting compound, saving both time and tape versus folding the tape by hand. It features a handle allowing it to be used in-situ, together with mounting points and fixings so that it can be mounted to a workshop bench or wall. Manufactured from ABS plastic & steel.

### Additional Information

- Special design automatically folds a soft edge into the tape when pulling through the dispenser to avoid a hard tape line.
- Tape holder suitable for use with 25mm masking tape.
- Features a sharp serrated blade allowing the tape to be easily cut to the required length.
- The dispenser can be fixed to a work bench or wall using the fasteners included.
- Masking tape not included, but is available separately, please see Connect Part Nos. 35213 and 35215.
