

Glass Cut Out Wire - Nylon

Nylon windscreen cutting wire, suitable for cutting through the urethane bond in order to remove the windscreen from the vehicle. Provides a less aggressive solution than traditional metal cutting wires enabling it to be used safely on carbon fibre and aluminium bodies and reducing the risk of causing damage to paintwork, plastic trim, or pinch welds.

Additional Information

- Reusable nylon cut out wire for glass & trim removal, ideal for more sensitive work areas.
- Length: 50 metre roll.
- Safer to use than traditional cutting wire. Line will not coil back or retract if it breaks.
- Will not damage paint work or trim; can be used on aluminium/carbon fibre bodies.
- Performance comparable to metal cutting wires.
