

Cold Glue 50g for PDR

50g of cold glue, suitable for use as part of a paintless dent repair (PDR) or automotive body repair. Used as an alternative to a hot glue system, this sticky adhesive is warmed up in the user's hands before use.

Additional Information

- For use with most PDR dent removal kits, such as Power-Tec Part No. 92645.
- No need for external heat source, gas or electrical power.
- The glue is easily removed by hand.
- The glue can be re-used if kept clean and free from grease.
- Supplied in metal storage tin.
