

Pulling Tower Kit

This kit comprises of the Power-TEC pulling tower, Part No. 92767, together with; a glue gun, glue pads, glue sticks and glue removal spray. The pulling tower is fast and easy to install, with a height adjustable mechanical hoist (extension pole available to raise height for commercial vehicles Part No. 92768). Ideal for use on steel and aluminium panel repair. Designed to reach a pulling traction force up to 600kg, it is counterbalanced by an anchoring plate / suction pad, which features a vulcanised rubber pad and is held onto the ground using the workshop air supply, allowing it to be used anywhere on the workshop floor without the need to drill in any anchor points or fixings. It is supplied with a claw hook for use with weld on squiggly wire, Miracle System bits, glue pads (included), weld-on tack & pull plates and various other applications.

Additional Information

- Portable pulling tower suitable for use on steel & aluminium panel repair. Supplied together with Gluematic glue gun (Part No. 91237), 4pc pack of glue pads (Part No. 92356), glue sticks 15pc (Part No. 92342) & glue removal solvent spray (Part No. 92341).
- Pulling force up to 600kg. Counterbalanced by a pneumatic suction anchoring plate, therefore no fixings required.
- Dimensions: 350 x 350 x 1700mm. Weight: 20kg.
- Now features a height adjustable mechanical hoist, together with a 2pc pole for ease of storage & transportation. Supplied with hook gripping head, eyebolts & hooks.
