

PDR Pulling Pad Set

An assorted set of connectable glue puller pads, complete with pad holders, designed to be used in conjunction with a slide hammer or dent puller and hot glue to remove larger dents and creases in vehicle bodywork as part of a PDR glue repair. The individual puller pads are designed to be linked together, and each feature a pivot which allows them to be angled/curved to follow the contours of the bodywork or the shape of the dent, providing a larger continuous contact area which reduces the amount of tap down work required once the pads have been removed. All supplied in a plastic storage case.

Additional Information

- For use as part of a paintless dent repair, when used with a glue pad puller.
- Includes: 24x connectable puller pads (3 sizes, 8pc of each). 1x 160mm curved pad holder. 1x 160mm, 1x 90mm & 1x 70mm straight pad holder. 4x adaptors. 1x M10 x 1.5 adaptor for use with accessories, including the Power-TEC Pulling Tower, Part No. 92767.
