

Dust Extractor 38L

A portable industrial dry vacuum cleaner designed for use as a dust extractor when working with pneumatic and/or electric sanding tools etc. It features a 38L waste drum, a workshop air inlet and 2-in-1 hose for use with air powered tools, together with a 3 pin BS electrical socket with a 1000W output for use with power tools. It can be switched between an automatic mode, which turns the vacuum on when the connected tool is being used and switches off 5 to 10 seconds after the tool has stopped running, and a manual mode where the vacuum runs continuously.

Additional Information

- Mains powered dust extractor, featuring both an air & mains power outlet, for use with sanding, drilling & cutting tools fitted with a dust extraction hose connector/exhaust.
- Size: 790 x 545 x 560mm. Weight: 16.66kg.
- Drum capacity: 38L. Power: 220-240V, 1150-1350W. Max Vacuum: 2450mm H₂O ±10%. Air Flow: 2.9m³/min ±10%. CE certified.
- Includes: 1x 5m 2-in-1 hose (92707), suitable for use with pneumatic tools, 1x dust bag (Part No. 92706), 1x paper filter (Part No. 92705). Additional tool & accessories rack also available, please see Part No. 92698.
- Suitable for use with Power-TEC Air Palm Random Orbital Sander (Part No. 92685) & Electric Random Orbital Sander (Part No. 92696).
