

Overspray & Fine Detailing Clay Sheet

The Power-TEC 92747 is a new way to detail and clean paintwork prior to final polishing. Simple and faster to use than a clay bar. The Power-TEC clay sheet is flexible but keeps its shape, it is easy to use and easy to clean. Designed to remove blemishes, stuck and ingrained dirt as well as paint deformities in a controlled manner. Fine enough not to damage existing ceramic polish finishes.

Additional Information

- Clay sheet. Removes overspray & other contaminates. Works on any painted surfaces, glass, chrome & plastic
- Sheet size: 120 x 80 x 2mm thick.
- When used as directed, this product is not expected to damage or mark paintwork.
- NOTE: For best results use with a little soap & water from a spray bottle.
- For traditional clay bars please see Power-TEC Part Nos. 91454 & 91455.
