

Carbonstrike Hammer Set - 3pc

Carbonstrike hammers, commonly known by professionals as knock-down or blending hammers, are specifically designed for paintless dent repair (PDR). Their main attribute is precision and control, helping to reduce "high spots" or "crowns" created during the dent removal process. Carbonstrike hammers are constructed from carbon fibre, providing extra strength while remaining lightweight for improved balance. The user can accurately control each strike, and the spherical handle offers additional comfort, enabling optimal results with minimal effort and fatigue.

Additional Information

- Removable heads which can be interchanged to suit length of hammer handle required.
- Additional striking areas feature on 2 hammers, a stainless flat head for solid strikes & a leather coated head for softer application.
- Heads include Stainless Steel slightly dome-shaped face & pin type heads, together with soft PU (Polyurethane) slightly dome-shaped face & ball pein heads.
- Carbon fibre handle for superior strength, rigidity, lightness & feel.
- Handle lengths include: 320mm (Power-TEC Part No. 92764), 410mm (Part No. 92765) & 490mm (Part No. 92766).
