

Carbonstrike Hammer, PU Ball Pein - 410mm

The Power-TEC 410mm tap-down hammer, also known as a knock-down hammer or blending hammer, is a specialised tool used mainly for paintless dent repair (PDR). Its main function is to gently and precisely reduce "high spots" or "crowns" that are created during the dent removal process. The Power-TEC tap-down hammer range offers light weight with improved balance to enable the user to accurately control the hammer strike for the best finish possible with least effort and fatigue.

Additional Information

- Lightweight for precise control & reduced effort. Ball-shaped weighted handle end helps to improve balance & comfort.
- Features removeable soft PU (Polyurethane) slightly dome-shaped face & ball pein heads.
- Small section aluminium main head with removeable hammer faces.
- Carbon fibre handle for superior strength, rigidity, lightness & feel.
- Handle length: 410mm. Other models also available 320mm (Part No. 92764) & 490mm (Part No. 92766).
