

## Puller Bar Adaptor for Suction Pad

Designed in-house to allow the Power-TEC 92726 Puller Bar and Chain Kit to be securely connected to the Power-TEC Pulling Tower suction pads. This provides the pull bar with a moveable yet secure fulcrum point that can be mounted on any smooth floor surface, significantly increasing its usability for pulling down at an angle or parallel to the ground.

### Additional Information

- Connects the Power-TEC Puller Bar (Part No. 92726) to the vacuum pads from Power-TEC Part Nos. 92660, 92767, 92739, 92716 & 92664 pulling tower range.
- Significantly increases the potential uses of the Power-TEC Puller Bar & Chain kit (Part No. 92726) by offering a secure floor mounted pivot point.
- Ideal for allowing the Puller Bar to be used in combination with any dent removal system (PDR etc).
- Made in Sheffield.
