

Quick-Pull - PDR Recoil Hammer

A specially designed slide hammer with a spring-loaded centre shaft that allows single-handed use. As the user pulls back on the hammer, the shaft extends from the body. When the glue tab breaks free, the shaft retracts into the handle, significantly reducing the chance of the shaft causing additional damage.

Additional Information

- Ideal for small paintless dent repair (PDR) jobs requiring extended reach & one-handed operation, such as roof, bonnet, van-side & HGV cab dents.
- Can be used with cold glue & hot glue puller pads. Kit supplied with 6x anodised aluminium glue tabs & M12 x 1.75 adaptor for using cold glue adaptors from the Power-TEC cold glue kit, Part No. 92645.
- Suitable for use with adaptors from Power-TEC, Part Nos. 92645 & 92646 (Cold glue), 92760 (PDR hot glue) & 92663 (hot glue gun).
- Hammer length: 270mm (retracted) & 380mm (extended). Weight: 980g.
- An ideal addition to the Power-TEC Adhesion Pro GP System, Part No. 92748.
